Sintex

about us

Transform your home into a stunning masterpiece with Sintex Interior Products' extraordinary designs. Our range of products is crafted to perfection with uncompromising quality and unparalleled durability, making them the perfect addition to your smart home. Whether you're looking to renovate your living space or add a touch of elegance to your bedroom, our products are guaranteed to exceed your expectations.

Experience the convenience of low-maintenance and long-lasting interior solutions that will effortlessly elevate the aesthetic of your home. From sleek and modern to timeless and traditional, Sintex Interior Products offers a wide variety of designs that cater to every taste and preference.

Upgrade your living space today and immerse yourself in the beauty of Sintex Interior Products.

Sintex Plastics Division was started in the year 1975 to offer discerning customers a choice of distinctive products for their interiors. From kitchen cabinets to wall panels, storage units to ceilings and doors, you're sure to find something unique for your home in the Sintex range of Interiors products.

uPVC: MATERIAL FOR VARIOUS APPLICATIONS

Sintex

UNIQUE FEATURES:

Termite & Borer-proof:

Ideal for use in moist areas, with no harmful chemicals added, our products do not get affected by termites or borers.

Waterproof:

Naturally water-resistant, our products do not lose shape, bend or warp due to moisture absorption.

Fire Retardant:

Resistant to ignition and with limited spread of flames characteristics, uPVC ensures safety from fire.

Lightweight:

Our products are hollow and light; hence, timber, MS, aluminium, plastic sections or any light weight section can be used to mount our wall and ceiling tiles.

Quick Time to Convert:

With our panels, one can directly start fabrication, and jobs can be completed in even a day's time. They also can be easily engineered to the application and requirements.

No Urea Formaldehyde:

This substance is carcinogenic in nature - hence, it is not used in our products. uPVC has no component at all that is hazardous to human beings.

100% Virgin Material:

This lends elasticity and adds to product life. It also assures you of good strength, excellent finish, and enough flexibility to create arches and soft bends.

Anti-Fungal:

Unlike wood, which has the tendency to get infected by fungus due to moisture, our products are not affected by water and do not allow the growth of fungus.

Balanced Product:

Our products are balanced and do not need any further treatment on the second side - no need to worry about warpage or bending. uPVC allows you to have similar finishes or create variable finishes on both sides.

Cost-effective:

uPVC is an alternative for wood and engineered wood panels in the furniture industry, in doors and furniture profiles.

Sturdy Material:

uPVC is unaffected by harsh weather conditions.

Eco-friendly:

uPVC is eco-friendly and recyclable.

Low Maintenance:

Long-lasting and tough, this material requires hardly any maintenance.

All Sintex Interiors Products are constructed from uPVC - unplasticised Polyvinyl Chloride. Strong, durable yet lightweight, it can be fabricated to look natural, and is available in a variety of colours.

SINTEX INTERIORS:
GOOD-LOOKING,
LONG-LASTING & SAFE

UNIQUE FEATURES:

Extensive Applications:
Includes kitchen cabinets, storage solutions and wall decor.

Stylish Looks:
Each product is designed to add a touch of elegance to your home.

100% Virgin Material:
Provides flexibility and durability.

Convenience:
Lightweight, easy to install. It allows you to have a similar, or variable, finish on both sides.

Sturdy & Safe:
Our products are termite and borer proof, have anti-fungal properties and are safe for children. No carcinogenic materials like urea formaldehyde are used.

Plastoboard

Looking to make a bold and impactful statement with your interiors? Look no further than Sintex Plastoboards. Combining striking design with unbeatable utility, our Plastoboards are the perfect choice for any space.

Crafted with over 40 years of Sintex expertise in PVC formulations, our Plastoboards are not your ordinary materials. They're free from harmful chemicals, affordable, easy to install, and resistant to both water and fire. And with their unmatched durability and versatility, they offer an excellent alternative to conventional options.

But what really sets our Plastoboards apart is their ability to create a grand impression that lasts. Whether you're looking to create a stunning feature wall, a sleek ceiling, or a bold accent piece, our Plastoboards are sure to make a statement that's both striking and unforgettable.

So why settle for ordinary materials when you can have extraordinary? Choose Sintex Plastoboards for a beautiful, practical, and lasting solution that's truly one-of-a-kind.

APPLICATIONS

- Kitchen Cabinetry
- Residential Furniture
- Hospitality Furniture
- Office Furniture
- Healthcare Furniture
- Interior Partitions, Grills

Plastoboard

UNIQUE FEATURES

✓ Do's

- Storage:** It is recommended to stack the Plastoboards horizontally
- Usage of Screws:** It is advisable to use screws, to get the maximum holding capacity.
- Painting:** It is advisable to sand the surface and apply primer, and then paint the surface.
- Pasting of Decorative Veneer or Laminates:** It is advisable to sand the surface and use rubber-based adhesives. Both the sides should be treated similarly.
- Use of Tools:** Plastoboards are very easy to use panels. They can be sawn, drilled, cut and screwed like any engineered wood panel boards. Conventional carpenter tools can be used for them.
